

LUCAS FORMAGIO

BUSINESS INTELLIGENCE ANALYST | ANALYTICS ENGINEER | DATAOPS & AUTOMATION

Sao Paulo, SP, Brazil | +55 (11) 98777-8508 | lucasformagio7@hotmail.com | linkedin.com/in/lucasformagio

PROFESSIONAL SUMMARY

Business Intelligence Analyst and Production Engineer with 4+ years of experience in commercial operations analytics, BI-focused Analytics Engineering, data operations, and automation. Experienced in delivering end-to-end solutions, from requirements gathering and source integration to dimensional and semantic modeling, automation, and production support. Hands-on expertise in Power BI, Microsoft Fabric, Dataflows Gen2, DAX, Power Query, SAP BW/HANA, Databricks, SQL validation, Python, and Power Automate.

TECHNICAL AND BUSINESS SKILLS

Analytics & BI: Power BI, DAX, Power Query, dashboards, data visualization, KPI definition, revenue, gross margin, backlog, quotation lifecycle, and demand analysis

Data Engineering & Modeling: Microsoft Fabric, Dataflows Gen2, Lakehouse, pipelines, ETL, dimensional and semantic modeling, data integration, quality, and monitoring

Systems, Automation & Coding: SAP BW, BEx, SAP HANA/SD, Databricks, Protheus, SharePoint, APIs, Power Automate, AI Builder, Copilot Studio, SQL validation, Python, Excel/VBA, and Git/GitHub

Delivery & Governance: Requirements gathering, stakeholder management, agile delivery, backlog prioritization, documentation, version control, user training, and continuous improvement

PROFESSIONAL EXPERIENCE

Mid-Level Business Intelligence Analyst

Nov 2022 - Present

Avnet | Sao Paulo, SP, Brazil | Hybrid

- Lead the development and deployment of BI products for commercial intelligence across the quotation-to-after-sales lifecycle, integrating SAP BW/HANA, Protheus, Databricks, SharePoint, APIs, and operational sources into Power BI, Microsoft Fabric, and Dataflows Gen2; deliver executive dashboards and actionable analyses used by account managers, inside sales, management, and executives in strategic meetings.
- Manage a Microsoft Planner portfolio of 140+ initiatives and activities across 20 project workstreams, applying agile practices and backlog prioritization to analytics, databases, automation, governance, incidents, new projects, and changes; delivered 85+ enhancements and 6 new analytics products.
- Administer 18 production automations in Power Automate Cloud Flows, including 15 active flows for quotations, registrations/design wins, supplier backlog, price blocks, data updates, and recurring reports; generate approximately 450 documents, emails, and spreadsheets/month and 80+ reports/month through Power BI and Teams, saving 100+ team hours/month.
- Transformed selective quotation tracking into a consolidated Power BI view covering 45K+ rows/month, expanding traceability of pending items, quality and duplicate controls, feedback tracking, and operational risk visibility while reducing execution time by approximately 50%.
- Build budget, profitability, gross margin, demand forecasting/MRP, sample ROI, and registration/design-win conversion analyses using Power BI, Power BI Dataflows, and SAP, reducing consolidation time from up to two weeks to minutes and accelerating access to decision-ready information.
- Monitor adoption and reliability of Power BI analytics products, recording 2,500+ user interactions in approximately six months; establish KPIs, training, documentation, version control, data validation, operating procedures, and model health monitoring to strengthen governance and scalability.
- Modernize two international BI products in Microsoft Fabric, gathering requirements and conducting validation in English with stakeholders across regions; restructure sources, dataflows, and semantic models; build pipelines and a dedicated Lakehouse for high-volume data; develop a Python notebook for ETL and a SQL view as the Gold layer consumed by Power BI; eliminate manual updates, resolve reliability issues, and incorporate enhancements based on user feedback.
- Deployed Auto Packing Doc Address Resolver, a production AI solution using Copilot Studio, AI Builder, and Power Automate to identify addresses in packing documents, generate documents, trigger alerts, and summarize results in Teams; processes 10-15 documents/day and reduced execution time from up to four hours to 30 minutes.

Sales Representative (Concurrent Role)

Nov 2022 - Present

Avnet | Sao Paulo, SP, Brazil | Hybrid

- Manage approximately 300 customers through data-driven prioritization, qualification and registration in SAP SD, and structured account transitions.

Sales Intern

Nov 2020 - Nov 2022

Avnet | Sao Paulo, SP, Brazil | Remote

- Improved after-sales processes and tracking systems, increasing operational efficiency and traceability.

SELECTED PROJECTS AND RECOGNITION

Data & Analytics Portfolio: International BI Product Modernization, Quote Flow Tracker, MRP Demand Monitor, Backlog & Forecast Insights, Sample Investment ROI Tracker, and Sales Data Intelligence System.

Production Engineering Capstone - 2nd Place, INOVA FEI 2026: Integrated Power BI and Power Automate across 9 activities; estimated 74.48% fewer weighted steps, 65.75% fewer systems/screens, 335.5 fewer monthly analysis hours, and BRL 90,687.36 in annual savings.

EDUCATION

Bachelor's Degree in Production Engineering: FEI - Fundacao Educacional Inaciana Padre Saboia de Medeiros
